# INTERGROWTH-21<sup>ST</sup> PROJECT

## CONCEPTS, METHODS AND RESULTS

Dr Leila Cheikh Ismail  
Project Leader  
University of Oxford

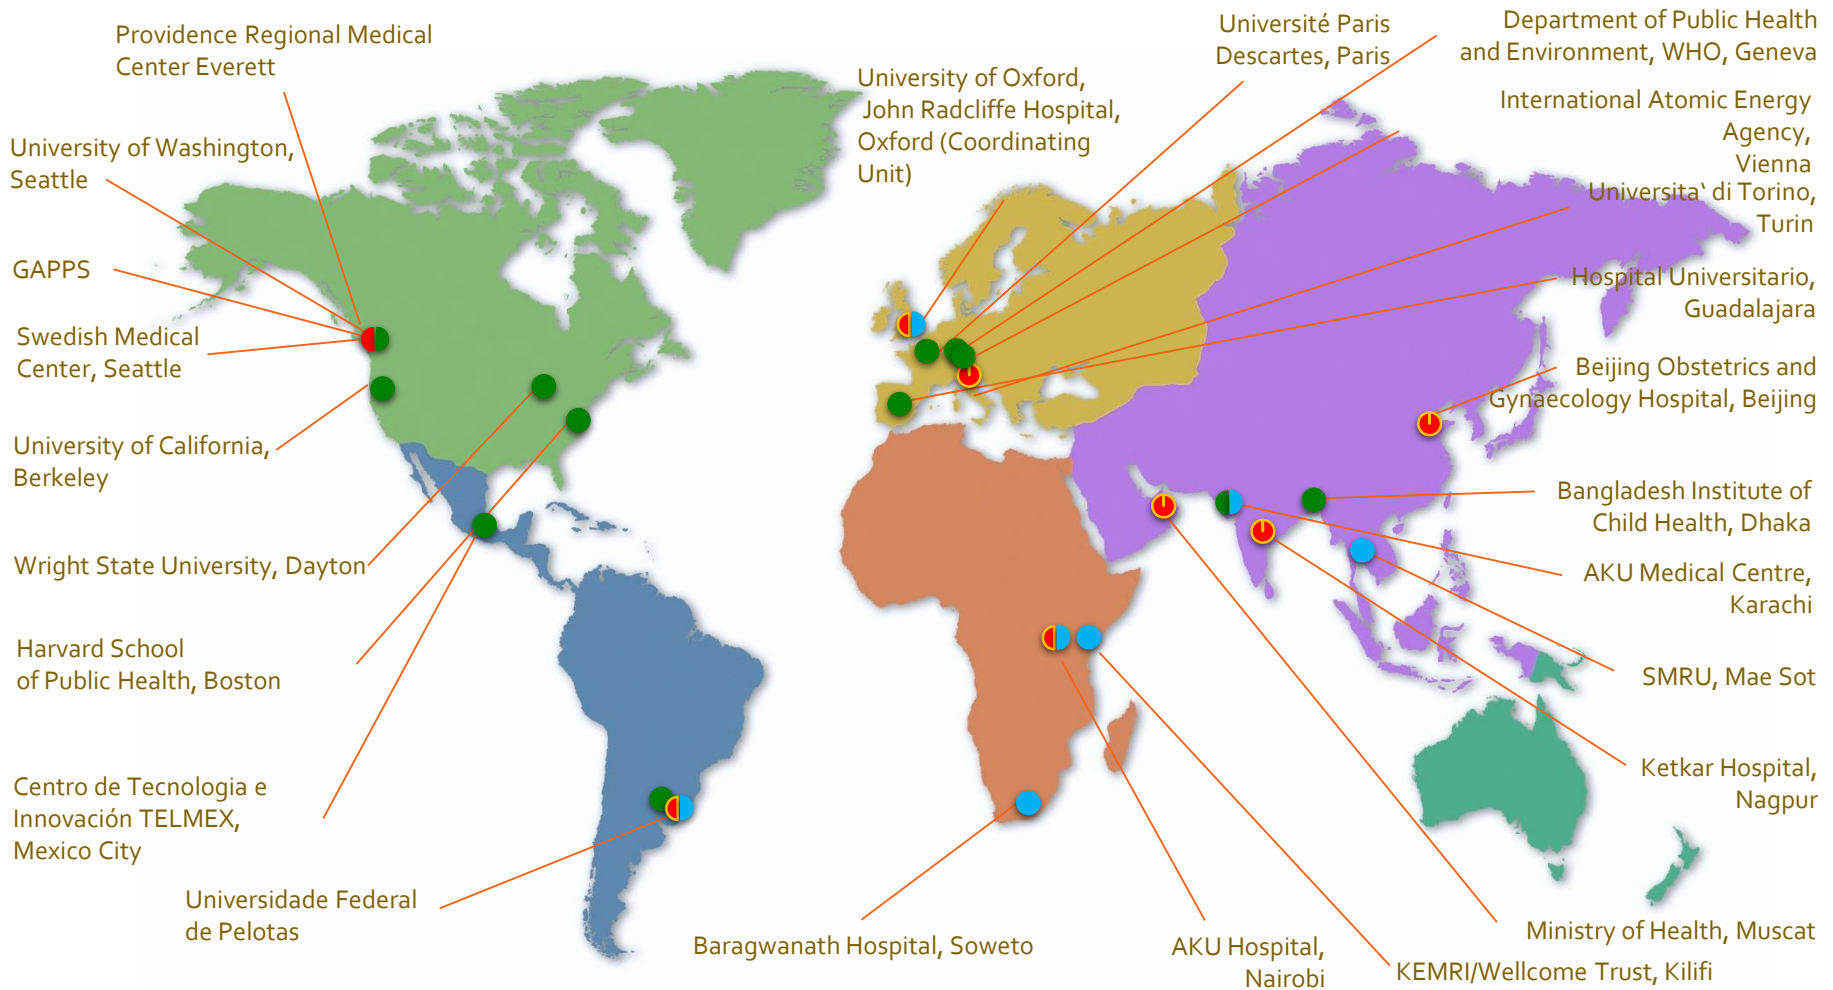

on behalf of:

*The International Fetal  
and Newborn Growth  
Consortium for the 21<sup>st</sup>  
Century*

*“Understanding early human growth and development across populations for better health and nutrition throughout life.”*

# INTERGROWTH-21<sup>ST</sup> PROJECT NETWORK

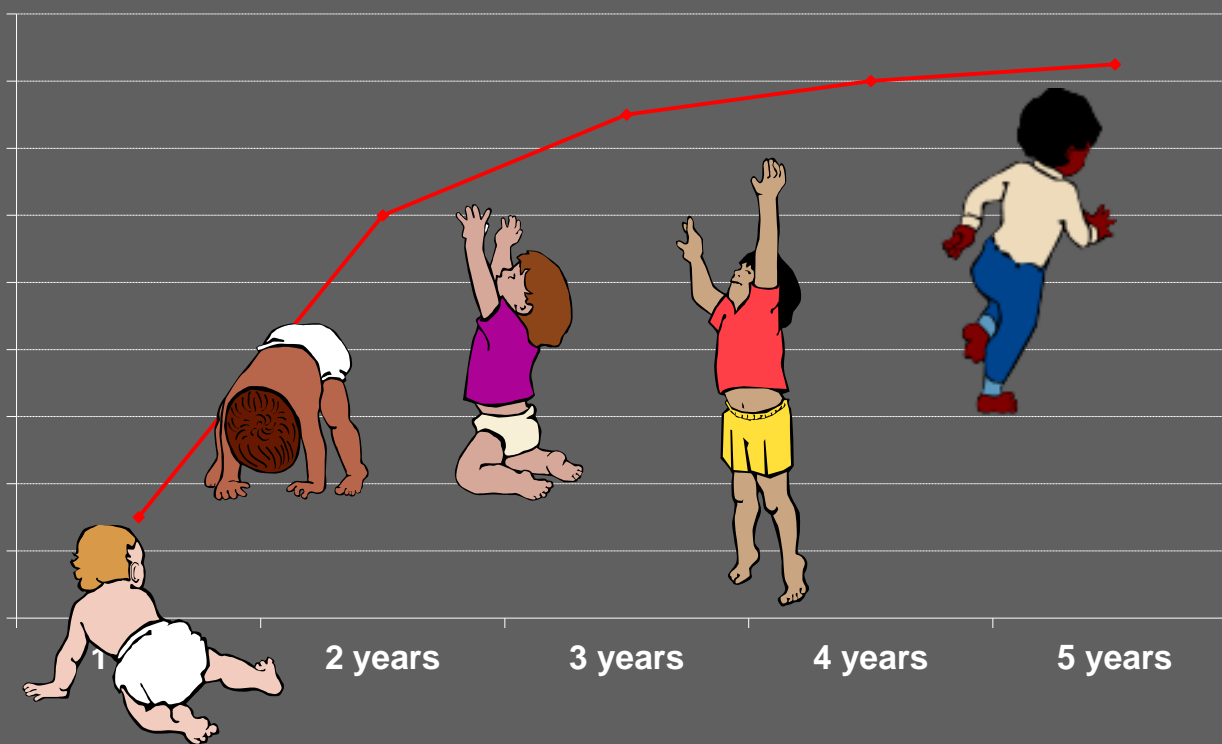

# INTERGROWTH-21<sup>ST</sup> PROJECT

WHY?

# WHO CHILD GROWTH STANDARDS

World Health  
Organization

# WHO CHILD GROWTH STANDARDS

## WHO child growth standards

### (0-60 months):

- Length/height-for-age
- Weight-for-age
- Weight-for-length/height
- BMI-for-age
- Head circumference-for-age
- Arm circumference-for-age
- Subscapular skinfold-for-age
- Triceps skinfold-for-age
- Motor development milestones

## What is missing?

### No information on:

- Growth during pregnancy
- Size at birth by GA
- Postnatal growth of preterm infants

# INTERNATIONAL FETAL AND NEWBORN GROWTH CONSORTIUM FOR THE 21<sup>ST</sup> CENTURY

## THE INTERGROWTH-21<sup>st</sup> Project

# SYSTEMATIC REVIEWS

**Crown-rump length / gestational age estimation** - Napolitano R, Dhama J, Ohuma EO et al (2014) *BJOG*

**Fetal growth monitoring by ultrasound** - Ioannou C, Talbot K, Ohuma E et al (2012) *BJOG*

**Birthweight charts** - Giuliani F, Ohuma E, Spada E et al (2015) *Acta Paediatrica*

**Preterm postnatal growth charts** - Giuliani F, Cheikh Ismail L, Bertino E et al (2016) *AJCN*

**Gestational weight gain charts** - Ohadike CO, Cheikh Ismail L, Ohuma EO et al (2016) *Adv Nutr*

**Material available  
diverse and of  
variable quality**

# WHO CHILD GROWTH STANDARDS

World Health  
Organization

# WHO RECOMMENDATION (1995)

Human growth worldwide should be  
evaluated using  
international standards describing  
how individuals should grow

# REFERENCES vs. STANDARDS

**Reference charts** describe how fetuses and newborns *have* grown at a particular time and/or place

**International standards** describe how fetuses and newborns *should* grow when nutritional, environmental and health constraints on growth are minimal

# REFERENCES vs. STANDARDS

**Reference charts** describe how fetuses and newborns *have* grown at a particular time and/or place

**International standards** describe how fetuses and newborns *should* grow when nutritional, environmental and health constraints on growth are minimal

# WHAT IS INTERGROWTH-21<sup>ST</sup>?

- Extend the concepts promoted by WHO MGRS into fetal and neonatal life
- Offer a conceptual continuity between the development and implementation of prenatal and postnatal growth standards

# AIMS OF INTERGROWTH-21<sup>ST</sup>

(1) Develop new 'prescriptive' standards describing normal fetal growth, preterm growth and newborn nutritional status

# AIMS OF INTERGROWTH-21<sup>ST</sup>

(2) Look at post-natal growth of the preterm and term INTERGROWTH-21<sup>st</sup> infants up to 2 years

# INTERGROWTH-21<sup>ST</sup> PROJECT

HOW?

# CHALLENGES

## Practical considerations:

Where?

→ Site selection

Who?

→ Population selection

## Methodological considerations:

Multicentre study

→ Same equipment, protocols, level of care and recommendations

Complement WHO charts

→ Same anthropometric equipment and protocol

Pooling the results

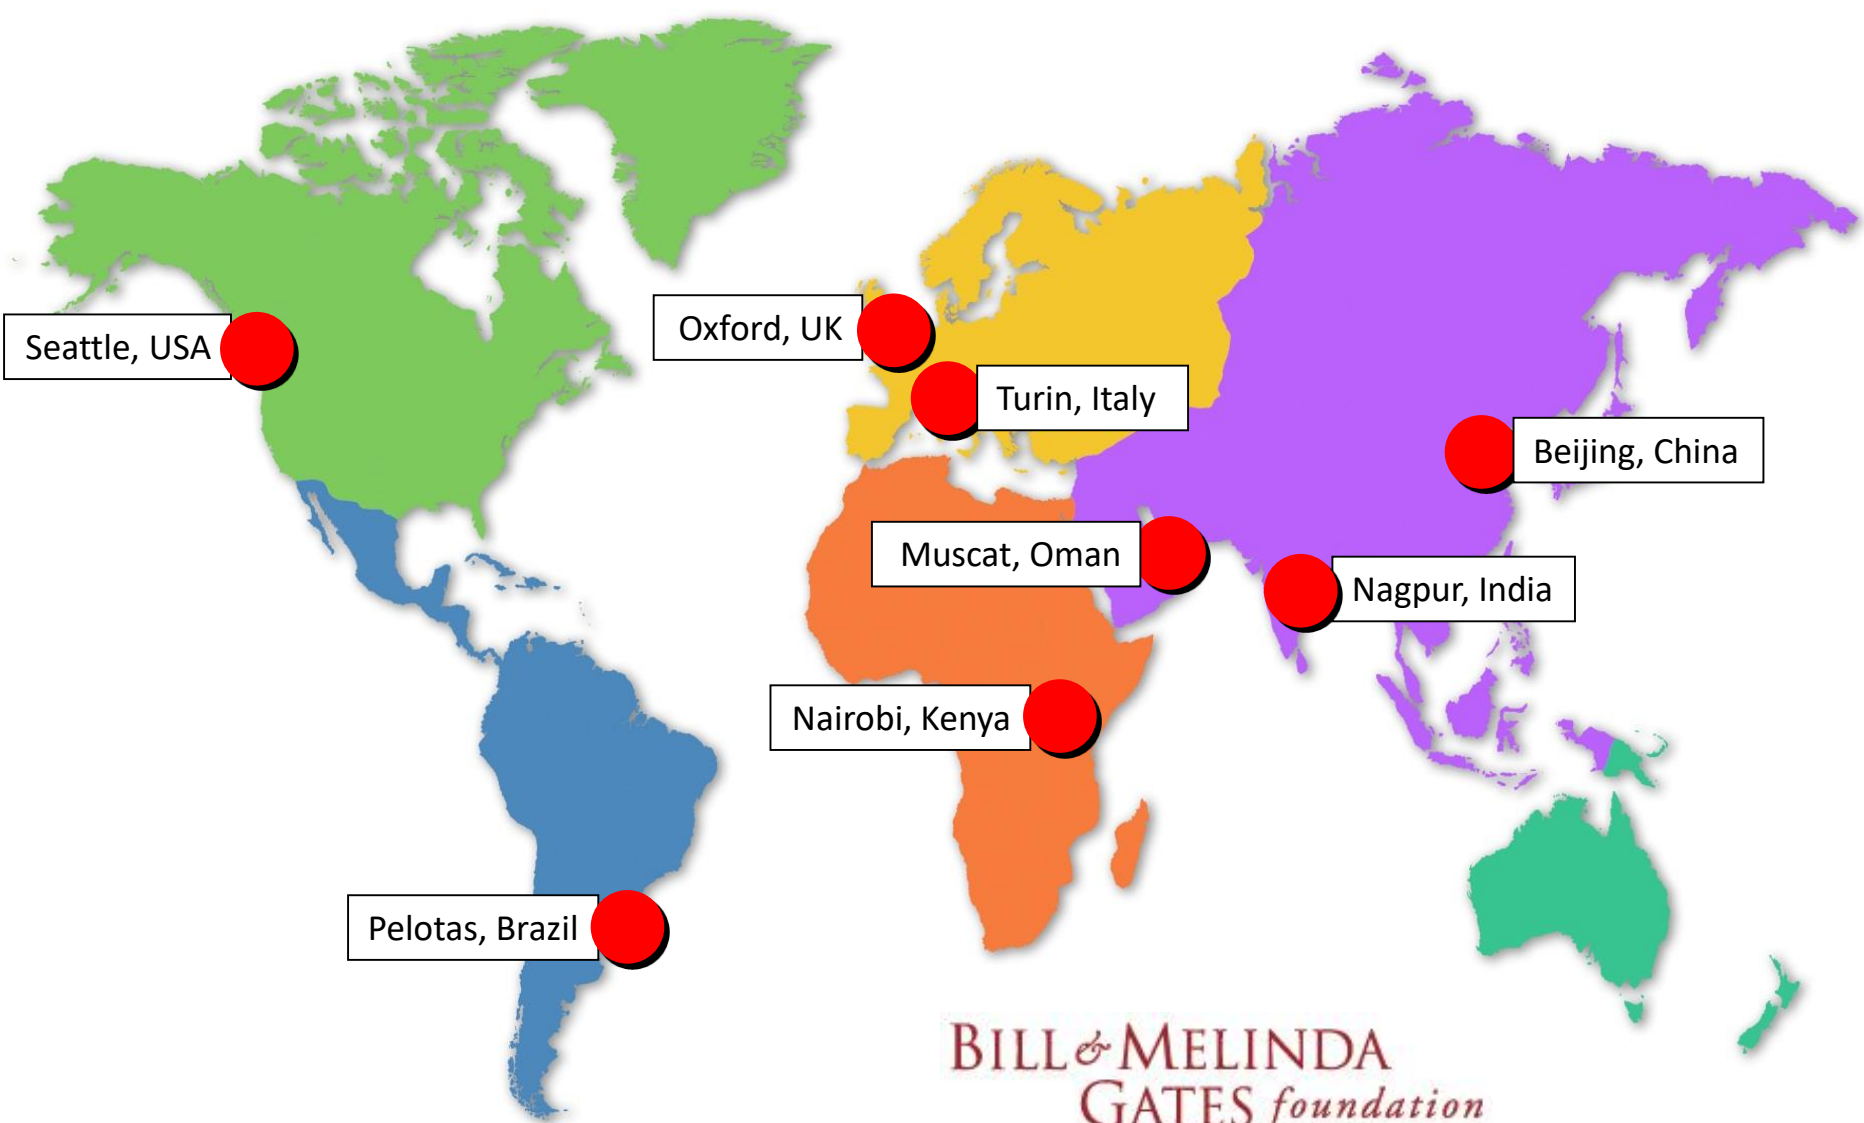

→ Ensuring good data quality throughout the study and across sites

# SITE SELECTION

“Healthy” environment criteria for FGLS site selection:

- Low-birthweight rate <10%
- Mean birth weight >3100g
- Perinatal mortality <20 per 1000 live births
- >75% mothers have attained an educational level/SES indicator greater than the locally defined cut-off points
- Lack of known, major, non-microbial environmental contaminants
- Altitude <1600m

# INTERGROWTH-21<sup>ST</sup> SITES

# POPULATION SELECTION

All pregnancies in 8 sites  
N = 60,268

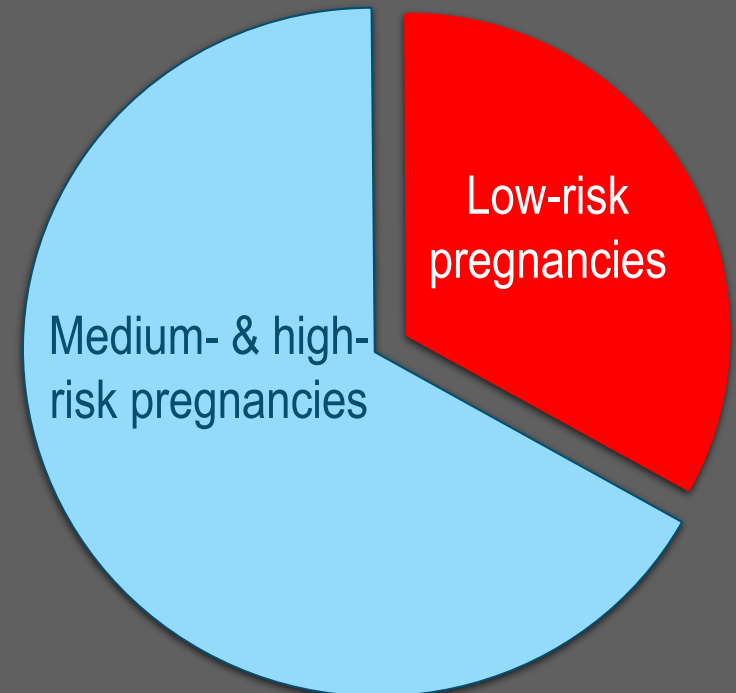

Low-risk study population  
+  
Healthy and well-nourished

# POPULATION SELECTION

All pregnancies in 8 sites  
N = 60,268

Low-risk pregnancies  
N = 20,486

# POPULATION SELECTION

## LOW-RISK PREGNANCY CRITERIA

- a) aged  $\geq 18$  and  $\leq 35$  years;
- b) BMI  $\geq 18.5$  and  $< 30$  kg/m<sup>2</sup>;
- c) height  $\geq 153$  cm;
- d) singleton pregnancy;
- e) a known LMP with regular cycles (defined as a 26-30 day cycle in the previous 3 months), without hormonal contraceptive use, pregnancy or breastfeeding in the 3 months before pregnancy;
- f) natural conception
- g) no relevant past medical history (refer to screening form), with no need for long-term medication (including fertility

**Criteria defining a low-risk study population as healthy and well-nourished (both before and during pregnancy) to ensure that fetal growth is optimal**

- o) no clinically significant atypical red cell alloantibodies;
- p) negative urinalysis;
- q) systolic blood pressure  $< 140$  mmHg and diastolic blood pressure  $< 90$  mmHg;
- r) haemoglobin  $\geq 11$  g/dl;
- s) negative syphilis test and no clinical evidence of any other sexually transmitted diseases, including clinical Trichomoniasis;
- t) not in an occupation with risk of exposure to chemicals or toxic substances, or very physically demanding activity to be evaluated by local standards. Also women should not be conducting vigorous or contact sports, as well as scuba diving or similar activities

# INTERGROWTH-21<sup>ST</sup>

## THREE COMPLEMENTARY STUDIES

Newborn Cross-Sectional Study (**NCSS**) of all newborns in eight centres over 12 months

Fetal Growth Longitudinal Study (**FGLS**) from <math>14^{+0}</math> weeks of gestation to birth, with follow-up to age 2

Preterm Postnatal Follow-up Study (**PPFS**) of all preterm infants in FGLS to age 2

# INTERGROWTH-21<sup>ST</sup>

## THREE COMPLEMENTARY STUDIES

### **Newborn Cross-Sectional Study (NCSS)**

- Birth weight, length and head circumference for gestational age standards
- Epidemiological studies

### **Fetal Growth Longitudinal Study (FGLS)**

- International fetal growth standards

### **Preterm Postnatal Follow-up Study (PPFS)**

- Preterm postnatal growth standards

# FGLS

TO DEVELOP NEW FETAL GROWTH STANDARDS

# FGLS

## TO DEVELOP NEW FETAL GROWTH STANDARDS

Screening Phase (<14 weeks' gestation)

Follow-up Phase: visits every 5 ( $\pm$ 1) weeks

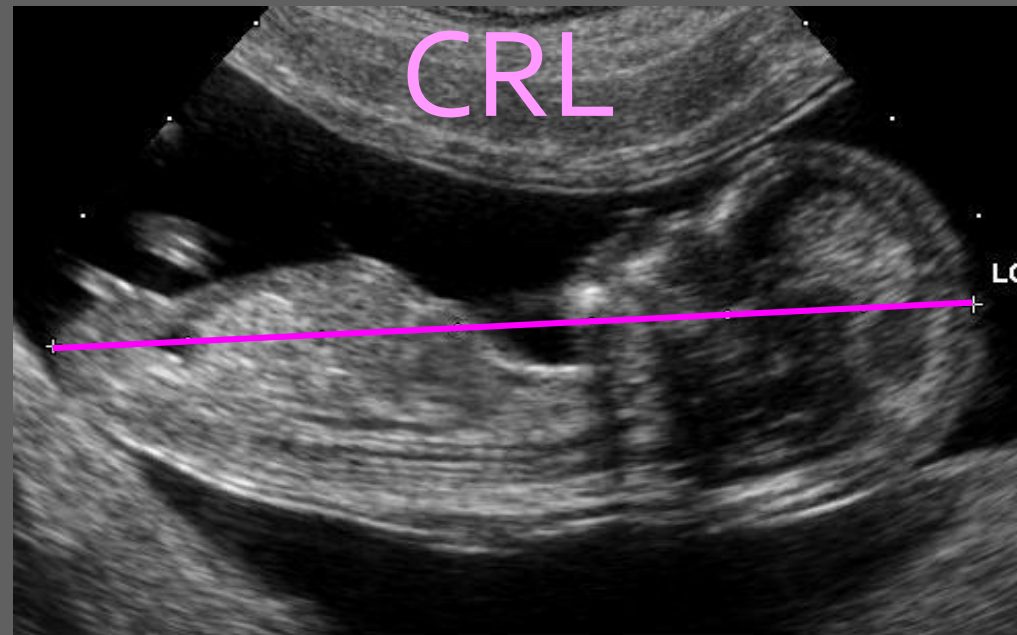

If the woman is referred to another level of care at any stage during her pregnancy, complete a Maternal referral/admission form.

Upon delivery, collect delivery information and anthropometry

# ULTRASOUND MEASUREMENTS

# PEAPOD®

## INFANT BODY COMPOSITION SYSTEM

**COSMED**  
The Metabolic Company

- 7-minute test
- Estimates body composition by densitometry
- Calculates the amount of fat mass and the fat-free mass
- UK only

# PPFS

TO DEVELOP NEW GROWTH STANDARDS FOR  
PRETERM INFANTS

# PPFS

## TO DEVELOP NEW GROWTH STANDARDS FOR PRETERM INFANTS

For all babies born to mothers in FGLS at  $\geq 26^{+0}$  and  $< 37^{+0}$  weeks of gestation at birth:

Collect delivery information and anthropometry (within 12 hours if possible)

At 48-72 hours after birth, collect health information and anthropometry

Follow-up visits for 2, 4, 6, and 8 weeks after birth. Collection of health and dietary information and anthropometry

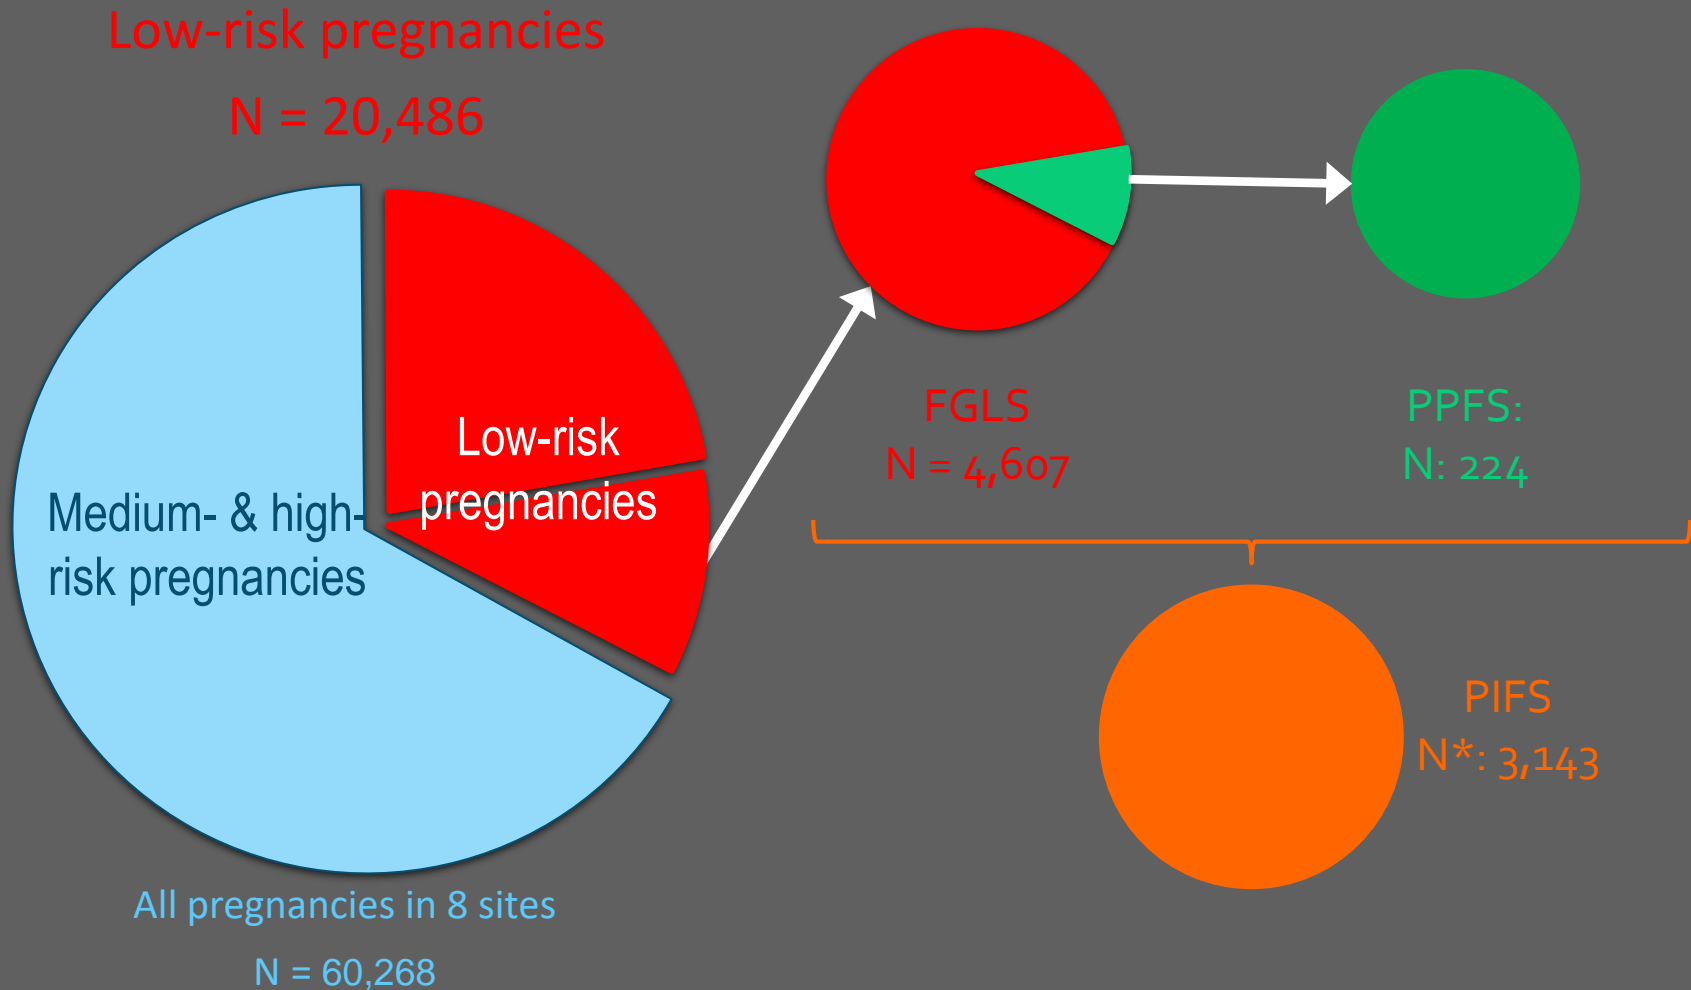

Follow-up visits for 3, 4, 5, 6, 7, and 8 months after birth. Collection of health and dietary information and anthropometry

# PIFS

TO STUDY POSTNATAL GROWTH AND DEVELOPMENT UP TO 2 YEARS OF AGE

# PIFS

## TO STUDY POSTNATAL GROWTH AND DEVELOPMENT UP TO 2 YEARS OF AGE

Follow-up visit at 1 year of age. Collect health and dietary information, anthropometry and motor development achievement

Follow-up visit at 2 year of age. Collect health and dietary information, anthropometry, motor development achievement and neurodevelopment assessment

# DATA COLLECTED

- Retrospective severe and chronic morbidities, hospital admission and treatments
- Weight, length and head circumference
- 24h Infant Food Recall and Food Frequency Questionnaire
- Milestones achievement
- + Neurodevelopment assessment

PIFS<sub>1</sub>

PIFS<sub>2</sub>

# NEURODEVELOPMENTAL ASSESSMENT AT 2 YEARS

1. Gross motor function
2. Cognition, language development, behaviour and fine motor skills
3. Vision
4. Hearing
5. Sleep

# NCSS

TO PRODUCE SIZE AT BIRTH OR GESTATIONAL AGE STANDARDS AND EPIDEMIOLOGICAL STUDIES

# NCSS

## TO PRODUCE SIZE AT BIRTH OR GESTATIONAL AGE STANDARDS AND EPIDEMIOLOGICAL STUDIES

For every baby born in each hospital during the 12 month NCSS period the Pregnancy and Delivery form will be completed:

Anthropometric measurements (weight, length and head circumference) within 12 hours of birth (no later than 24 hours)

After delivery, collect delivery information

NO FURTHER follow-up of these babies required after hospital discharge

# Gestational weight gain standards based on women enrolled in the Fetal Growth Longitudinal Study of the INTERGROWTH-21<sup>st</sup> Project: a prospective longitudinal cohort study

Leila Cheikh Ismail,<sup>1</sup> Deborah C Bishop,<sup>1</sup> Ruyan Pang,<sup>2</sup> Eric O Ohuma,<sup>1,3</sup> Gilberto Kac,<sup>4</sup> Barbara Abrams,<sup>5</sup> Kathleen Rasmussen,<sup>6</sup> Fernando C Barros,<sup>7,8</sup> Jane E Hirst,<sup>1</sup> Ann Lambert,<sup>1</sup> Aris T Papageorghiou,<sup>1</sup> William Stones,<sup>9,10</sup> Yasmin A Jaffer,<sup>11</sup> Douglas G Altman,<sup>3</sup> J Alison Noble,<sup>12</sup> Maria Rosa Giolito,<sup>13</sup> Michael G Gravett,<sup>14</sup> Manorama Purwar,<sup>15</sup> Stephen H Kennedy,<sup>1</sup> Zulfiqar A Bhutta,<sup>16,17</sup> José Villar<sup>1</sup>

# The International Gestational Weight Gain Standards

# CONCLUSIONS

- Fetal, newborn and infant growth are similar across populations when constraints on growth are minimal, justifying the construction of **International Growth Standards**
- The INTERGROWTH-21<sup>st</sup> & WHO Child Growth Standards monitor growth up to 5 years of age using the same instruments
- Growth monitoring promotes continuity of care from the womb to the classroom worldwide

This web site provides clinicians and researchers access to the INTERGROWTH-21st **Global Perinatal Package**. This package is comprised of new, globally-validated standards and practical training resources. To download the standards please use the download links to the right of this page.

These standards are paired with an expanding **Training Toolkit** and a rich body of literature on our **methods**.

Policymakers may be interested in learning our progress with **dissemination** so far, and the implications of our new standards for **health policy**.

A selection of INTERGROWTH-21st-related news articles from around the world and information regarding press inquiries is available on our **Media** page.
